

WHY IS \*MP\*R\*\*L\*SM A DIRTY WORD?  
(AN SDS ADVERTISEMENT FOR ITSELF)

Let us tell you something about ourselves while waiting for the monitor in Mem. Aud. to ask you to raise the seat when you leave. Students for a Democratic Society is concerned about this country. We are an education and social action organization dedicated to increasing democracy in all phases of our life. We want, frankly, to build a movement through which young people can create a society free from ignorance, war, exploitation, and the rest of what goes along with man's inhumanity to man. So all the demonstrations and White Plaza harangues are about something.

This leaflet includes coming attractions for our April program, which is about imperialism. Now the word "imperialism" has been used to identify the rhetoric of America's enemies. Only dirty filthy commie rats said "imperialism" in the comics and movies we were brought up on. In April we want to talk about that word and what it means, how it works, and where it touches our lives. We will try to restore the word "imperialism" to our language calmly, but not without anger, rationally but not without passion, and realistically but not without hope for our country.

We are also including a good letter from a German scholar to an American academician, reprinted from the New York Review.
