

Editor, THE DAILY:

We, as Stanford employees, solely empathize with the SRI Coalition. We are also very concerned with the reaction of the trustees to our demands and hope that they end their research on CWB, counterinsurgency, and other war-related research.

\* We are appalled by the research that has been going on at SRI, but are hoping for a termination to the research as soon as the trustees "wake up."

An Anthropology Secretary

Editor, The Daily

We fully support the SRI Coalition demands and the actions being taken to secure those demands.
