

MASTERS OF WAR

1. APPLIED TECHNOLOGY (division of Itek)--\$3.3 million dollar "Wild Weasel" electronic warfare contract. "Itek's Applied Technology Division has grown rapidly because of its ability to meet the rapidly changing requirements of electronic warfare." (Itek Corporation)
2. ENERGY SYSTEMS (an Aydin Company)--\$3.1 million contract for "AN/TRC97A" military communications equipment.
3. HEWLETT-PACKARD--\$11,852,000 in local "defense" contracts in fiscal 1970. Aircraft navigation and guidance systems, mortar fuse components, and measuring devices.
4. KAISER AEROSPACE AND ELECTRONICS--\$766,000 in local "defense" contracts in fiscal 1970. Aircraft vertical display indicators.
5. LOCKHEED AIRCRAFT--\$4,178,000 in Palo Alto "defense" contracts, 1970. Nation's largest "defense" contractor.
6. SINGER (Electronics Division, formerly Alfred Electronics)--\$809,000 local contracts in fiscal 1970. Electronics equipment components.
7. VARIAN ASSOCIATES--\$10,661,000 Palo Alto contract for fiscal 1970. Missile Guidance systems, electron tubes.
8. WATKINS-JOHNSON--\$7,262,000 in "defense" contracts locally in fiscal 1970. Microwave electronic devices, electronic surveillance equipment.

These companies and many more are located in the Stanford Industrial Park, on Stanford land.

We in the New Left Project support today's march because it is a gesture of broad opposition to the escalating War in Indochina. We feel, however, that to be effective we must focus on local institutions supporting the war effort. By working to redirect the resources of our community, we can exert leverage over national policy.

The New Left Project proposes that the anti-war movement stage a march through the Stanford Industrial Park, similar to the November, 1969 Moratorium March, and that we begin a continuing campaign against the Masters of War.
